

It is well established that the cited references must disclose all the claim elements in order to support a §103 rejection. The citations fail to disclose any refilling of the ink reservoirs that supply the printhead. Accordingly Silverbrook and Petersen do not anticipate the present invention.

It is respectfully submitted that the §103 rejection has been maintained in error and the application is now in condition for allowance. Accordingly, we ask that the finality of the previous report be withdrawn and the application allowed.

Very respectfully,

Applicant:

Kia Silverbrook
